

Figure 5b (FER-216). Late Quaternary faults exposed in the downtown San Diego area, Point Loma 7.5 minute quadrangle. Circled locality numbers are referenced in the text. Yellow highlighting indicates faults recommended for Special Studies Zone.

faults: solid line where accurately located; short-dashed line where approximately located; dotted line where inferred; queried where uncertain. Arrow indicates dip direction of fault. Long-dashed line based on marine geophysical data (Kennedy and Welday, 1980).
